

UTEACH STEM EDUCATORS CONFERENCE

May 20–22, 2025 • Reno, Nevada

Developing STEM Teachers = Growing the STEM Workforce

SPONSOR THE 2025 UTEACH STEM EDUCATORS CONFERENCE

Over the last decade, the total number of STEM teachers prepared across the country has been dropping and the demand for a STEM-prepared workforce continues to grow. Where will that workforce come from if students don't have qualified STEM teachers in the classroom?

Take this opportunity to support our work as a sponsor or exhibitor for the UTeach STEM Educators Conference, May 20–22, 2025 in Reno, Nevada.

Your sponsorship is an opportunity to connect with a premiere national network and influence the future of STEM teaching and learning.

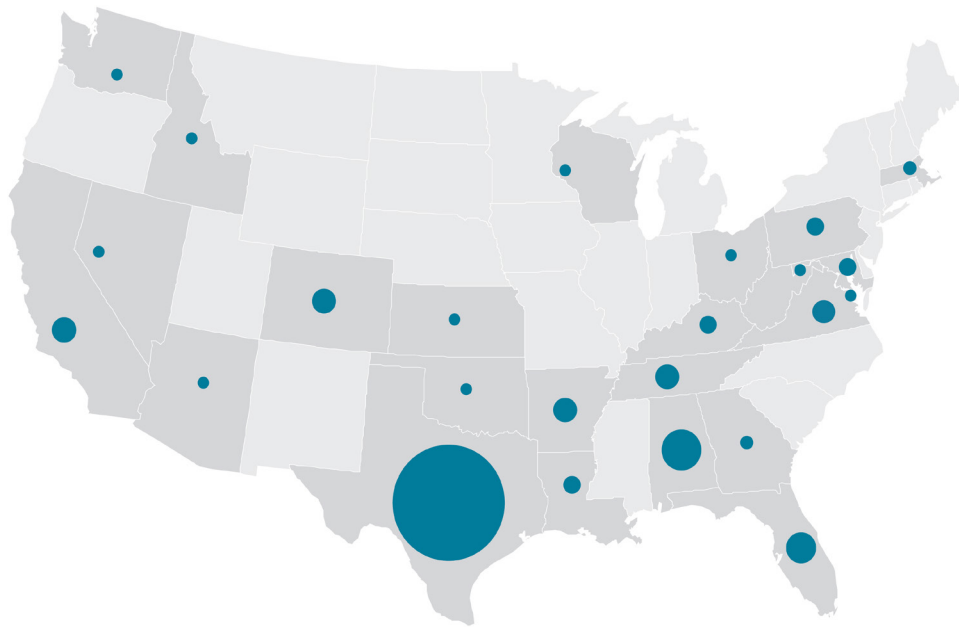

The UTeach STEM Educators Conference is the yearly incubator for 300+ university faculty and staff, UTeach alumni teaching and leading in K–12 schools and districts, UTeach students, and higher education leaders for connection and innovation.

UTeach programs are in 54 universities across the nation, preparing skilled STEM teachers who build enthusiastic STEM students who enter the workforce. Supporting the growth of UTeach programs creates a strong STEM workforce.

Learn more

54 UTeach programs are in 23 states and the District of Columbia. Together, the programs have produced more than **9,000 graduates.**

Exhibitors: Who sees your products?

University educators from our 50+ UTeach teacher preparation programs who amplify the use of educational resources with their preservice teachers.

Mentor teachers who support UTeach students with a variety of educational resources as they plan and present lessons in their middle and high school classrooms.

UTeach alumni who continue using resources they know and trust when they have their own classrooms.

UTeach alumni in leadership positions at school districts who make districtwide decisions about curriculum and resources.

Sponsors: How do you support the next generation of STEM educators?

At the UTeach STEM Educators Conference, UTeach faculty and staff share research and best practices for preparing students to be the best teachers.

Program leaders work together to address challenges at all levels, from recruitment of students to teacher development programs to program design and funding.

Students attend sessions that broaden their experience and knowledge. They present posters displaying their research and see firsthand that they are part of a large network of educators.
