

2023 Summit

RECRUITING AND PREPARING MORE STEM TEACHERS: **UNIVERSITY-BASED SOLUTIONS**

UTeach Institute

MARCH
2-3

Join the UTeach Institute for a special summit designed to bring together university-based teacher preparation programs, STEM teacher development experts and stakeholders, current STEM teachers, and others to discuss shared challenges around recruiting, preparing, and supporting STEM teachers for our nation's schools. Hear from researchers and practitioners about the extent of the teacher shortage and suggestions for how universities can help solve it.

The national network of 56 university-based UTeach programs has been preparing and supporting teachers for high-shortage STEM fields for 25 years. During this convening, they and other participants will share information about how messaging, incentives, outreach, human resources, and program design can be optimized to recruit more undergraduates and degree holders to consider a career in teaching STEM.

This event is supported in part by the U.S. Department of Education Supporting Effective Educator Development (SEED) Award #U423A180139.
