UTeach answers the challenge for universities to train more science, mathematics, computer science, and engineering teachers by enabling students studying these disciplines to earn teaching credentials without additional time or cost beyond their degrees.

A unique collaboration among colleges of science, education, and liberal arts, UTeach prepares teachers with deep content knowledge and proficiency with pedagogical strategies that promote student mastery of science, technology, engineering, and mathematics (STEM) principles and concepts.

The UTeach Institute supports a national community that improves STEM education by increasing the number and diversity of high-quality teachers and improving access to inquiry-based curriculum.

UTeach graduates are projected to teach more than 6 million secondary STEM students by 2024.
